

Bluelab

Bluelab Combo Meter with Leap pH Probe

3 in 1

pH, Nutrient and
Temperature

Bluelab Leap pH Probe for
pH measurement directly in
the root zone

pH

Nutrient

Temperature

Plant-health in the palm of your hand

Fast, reliable and versatile: Combo Meter with Leap pH Probe means you will be able to measure more and build a better understanding of your complete growing system.

The multimedia Leap pH probe can be used to measure nutrient solution and directly in the root zone in a range of growing substrates including soil, rockwool, coco coir and peat.

Measuring made easy

Know your pH – optimise nutrient uptake with the ideal pH of nutrient solution and pH directly in the root zone

Know your nutrient level – optimise growth by ensuring the right amount of nutrients for the growth stage of your plants

Know your temperature – ensure the nutrient solution is at the right temperature for your plants to be able to access the available nutrients

Features & benefits

- **Maximise nutrient uptake**
Measure three key parameters to ensure your nutrient solution is at the right level and available to your plants.
- **Get the whole pH picture**
Measure nutrient solution pH and pH directly in the root zone to optimise nutrient availability through the growing system. The detachable Leap pH probe with simple, 2-point calibration makes for ease of maintenance.
- **Measure more, understand more**
Fast, intuitive and versatile; Combo Meter means you will be able to measure more and build a better understanding of your complete growing system.
- **Get up and running fast**
Quick and intuitive to use with simple one button presses to change between measurements.
- **Information when you need it**
The backlit, easy-to-read display and 2m/6' cables give you the ability to measure in places previously inaccessible. The small form factor also means you can take the Combo Meter with you to spot check wherever you are.
- **5 Year - Limited Warranty**
Comes with a free 5 year limited written guarantee. (6 month guarantee for Bluelab Leap pH Probe). Proof of purchase required.

Tools for success

Bluelab enables growers to produce healthy, nutrient-rich plants, with hand-held meters, monitors and controllers that easily and effectively measure and control pH, nutrient (EC), temperature and moisture in solutions and substrates.

Success by simplicity

With over 30 years expertise, Bluelab products provide growers with the critical data they need to maintain a productive system, empowering growers and promoting better yields.

From home-based through to commercial growing environments, our specialist products are perfected to meet the needs of a diverse range of growers.

Simple to use and built to last. Our mission is to enable growers around the world to create optimal environments for growing the best plants and foods.
