

# Combo Meter Plus

The iconic Combo Meter paired with a Leap pH Probe. Measure pH directly in soil, substrate and solution

## Boost plant health by measuring more, faster

- Know your pH: with the Leap pH Probe you can measure pH directly in soil, substrate and solution
- Know your nutrient level: optimize growth by maintaining accurate conductivity levels in solution
- Know your temperature: ensure optimal nutrient uptake by keeping your solution temperature in the right range

### A must for any grower

The meter is super mobile, very easy to use—and calibrates and measures everything you need—EC, temperature, and pH.

Kelsey Walter | Indoor Tropics | Bluelab retailer with stores in Cashmere, Ellensburg & Omak | Washington

#### Measure pH direct in the root zone, in seconds

Use the reinforced, spear tip to measure pH directly in the root zone. Works in soil, coco coir blends, stone wool, solution and more.

#### 3-in-1 portable meter

Our 3-in-1 handheld meter makes measuring pH, conductivity and temperature a breeze. Access hard-to-reach locations with the 6.6 foot / 2 meter cable.

#### Unlock your plants full potential

Double-junction probe technology ensures you get fast, accurate measurements.

#### Brilliantly simple

Our meter is easy to use, with a backlit display, auto-off functionality and simple push-button operation.

## The same great Combo Meter, now with a tougher Leap pH Probe

The Bluelab Combo Meter Plus is built for growers and comes with a 5-year limited written warranty.

Detachable double-junction Leap pH Probe that comes with a 6-month limited written warranty

Waterproof conductivity and temperature probe that's easy to clean and is factory calibrated.

### Compare our meters

Get acquainted with the Bluelab range by comparing the Combo Meter Plus with our other meters.
